## TAILORED SOLUTIONS

- Hydraulic power units can be electric motor or diesel engine driven
- Options for power packs include skid mounts, bump frames, and oil bunds
- Units come complete with individually-tailored, PLC and HMI control systems

## A UNIT FOR EVERY PURPOSE

- From a simple 0.5kW, 5-litre gear pump...  
...to a fully integrated 500kW, 12,000-litre axial piston pump system
- Denley is able to produce large, small, and completely bespoke units

## SAFETY FIRST

- Designed to industry and customer quality accreditations and standards
- Engineered to meet ATEX and IECEx certifications
- Manufactured under strict quality assurance to BS EN ISO 9001:2008

## A FULL TURNKEY SOLUTION

- We fulfil client specifications and working environment requirements
- Hydraulic power pack on-site installation and operator training is available
- Global after sales-service and support from our site and test engineers
